

Shifting Gears II Lecture Series

Transportation, Health and the Built Environment

You're invited to our most exciting lecture series on transportation ever, focussing on the critical relationship between health and transportation.

Lectures are sponsored by the Bombardier Foundation and the Active Transport Lab at the University of British Columbia and BC Recreation and Parks Association

Admission is free but seating is extremely limited and reservations are required. Call 778-782-5100 or email cstudies@sfu.ca.

CONTINUING STUDIES

Active Transportation in Copenhagen Niels Torslov, Traffic Director of Copenhagen

Wednesday, February 25, 7 pm

SFU Vancouver, Harbour Centre building
515 West Hastings Street, Vancouver

Only in Copenhagen would the Traffic Director be educated as a landscape architect. Of course, in Copenhagen, "traffic" means bicycles as much as automobiles. Niels Torslov show how they plan and build for children in order to encourage an active city, and how their transport policy focuses on cycling, climate change, health and urban liveability.

Upcoming Lectures

- Active Transportation in New York City
- Active Transportation in Ontario
- Active Transportation in Portland
- Walk 21 Team
